

Goals of 4H Photography Project

As stated on the Oregon 4H Photography website:

“In the 4-H Photography project, members learn to take attractive, interesting pictures that show good composition, sharp detail, and good use of light with whatever type of camera they have. Members can explore still and moving photography.”

Suggested goals to help you achieve this –

1. Recognize photography as a useful hobby and potential profession.
2. Observe and appreciate surroundings through the eye of the camera.
3. Develop and apply technical and artistic skills in photography.
4. Learn about photography as an art, a science and a communication tool.
5. Learn how composition, use of light, exposure, and focus effect a photo image.
6. Record events, ideas and situations for study or reference.
7. Increase knowledge of how to use a camera and related equipment
8. To be creative, solve problems and have patience while practicing a skill.
