

4-H Photo Monitoring Data Sheet

Date _____ Crew Members _____

Location _____ Plot number _____ Elevation _____ Season _____

Temperature _____ Annual Precipitation _____

A record is part of your 4-H project. Keep your record neat, clean, and up-to-date. If you need help, ask your parents or leader. If you need more space, attach another sheet of paper.

Monitoring is an effective way to find out if your project is meeting its goals and objectives. It can also show you how well, or how poorly, a management system is working. It can help you identify management changes you might need to make. Taking photographs is one of the most basic monitoring techniques. Photographs cannot tell the whole story about a project, but you can gather much information from pictures taken at the same point over a number of years.

Record of Best Photos

F. Stop	Focal Length	Film Speed 150	Time of Day	Compass Heading	Distance from Witness	Exposure Number	Subject Description

Place Photo Here

Comments (Weather conditions, grazing (before/after), wildlife activity, and general thoughts)

Comparison to prior years (Example: indications of trend, management changes, seeding programs, fencing)
